

Logitech - Statement of Work

EcoAct has assessed Logitech Scope 1 & 2 data against the relevant SBTi criteria to ensure consistency and alignment with the requirements of the SBTi target setting and validation process. EcoAct has conducted a high-level assessment of data collection coverage and boundary to ensure SBTi significance thresholds are being met and evaluated the Scope 2 methodology and market-based calculation route taken. As a result of EcoAct's assessment and the data provided, EcoAct are confident that the Logitech Scope 1 & 2 data is suitable for SBT setting and SBTi validation.

In addition, EcoAct have suggested suitable targets for Logitech that meet the SBTi validation criteria for Scope 1 & 2 for well-below 2.0°C and 1.5°C climate trajectories. In this process, EcoAct evaluated a range of suitable base years to provide Logitech with an informed target pathway aligned to climate science. These recommendations can be summarised as 72% absolute reduction of CY2018 Scope 1 & 2 emissions baseline by CY2030.
